CURRENT SITUATION

For tonight, weak down canyon flow is anticipated with weak northwesterly winds at the ridges. Relative humidity will exhibit moderate recovery overnight at lower elevations and poor recovery across the ridges and upper slopes. Firefighting resources will pursue opportunities to build and improve direct line to minimize further perimeter growth and support containment objectives. Fire suppression repair teams are actively engaged working around the fire perimeter and affected areas. Structures destroyed and damaged have been validated by damage assessment teams. Currently 53% of the burn assessment is complete.
